

Sizzlin' Science Parties

by

high touch high tech

**Make lifelong memories by
bringing the fun of
hands-on science
to your next party!**

A science party is the perfect way to combine birthday fun with hands-on learning. There are many party packages to choose from for different ages and interests.

All parties:

- are conducted by degreed professional instructors
- include hands-on science activities completed by up to 15 party-goers
- include 'goodie bags' to transport their take home experiments
- include a gift for the birthday Scientist!

Packages and Pricing

LET'S ROCK

Perfect for boys and girls, 5+

90 minutes, \$300

Become a true rockhound by learning the processes of how rocks are made. Erupt chemical volcanoes, and make your own metamorphic 'rock' out of putty. Finally put your rockhound's nose to the ground in search of real minerals and gemstones! Learn their names, and of course, keep all that you find! Our collection includes clear calcite crystals, amethyst, jasper, iron pyrite (fool's gold), amazonite, leopard skin, and MORE! *See add-ons for more options!

PALEO POWER

Perfect for boys and girls, 8+

90 minutes, \$275

Have your own fossil mini-museum set up for the young paleontologist, including real dinosaur bones, many other authentic fossils, both terrestrial and aquatic, and dinosaur models. Participants will not only learn how fossils are created by the natural processes of the Earth, including the eruption of simulated volcanoes; but also the processes of recovering delicate fossils. They will practice paleontology like the pioneers of fossil hunting by making rubbings, as well excavating fossilized shark's teeth and shells from their own 'fossil muffin' and taking home their findings! Get a hands-on FEEL for how imprint fossils of all kinds are made and take home your own 'fossil' formed in clay.

PHUNOMENAL FIZZIX

Perfect for boys and girls, 7+

90 minutes, \$300

Make this birthday PHUNOMENAL by exploring FIZZIX! Feel energy moving through water with our tuning fork. Investigate the poppers that defy Newton's Law of Inertia. Break white light into the colors of the electromagnetic spectrum and take the prism glasses home! Learn why things glow... Fool your eyes (AND YOUR BRAIN!) with an optical illusion spinner. Explore actions and reactions with air/pump rockets or water rockets (weather permitting) and bouncing balls that you personally have crafted using the laws of thermodynamics! Investigate flight with the world's simplest helicopter!

JEEPERS CREEPERS

Perfect for boys and girls, 5+

90 minutes, \$275

Creepy, crawly, weird and wacky; investigate the world of myriapods, arachnids and insects! See the world through the eyes of a bug and create a spider web to take home. See our BUGS up close and personal and touch if you DARE! Our tarantula, scorpion, and other creepy crawly friends will be most popular guests of the party! Perfect for a birthday or Halloween party!

POTION PIZZAZZ

Perfect for boys and girls, 5+

90 minutes, \$275

Perfect for the budding chemist, POTION PIZZAZZ includes explorations in physical and chemical changes. See Styrofoam dissolve right before your eyes while learning the basics of chemical safety. Uncover the 'secret' colors hiding behind markers. Mix solids and liquids (making gummi drops), liquids and liquids (making polymer putty), and even make a gas (erupting chemical volcanoes and geysers)! Take home your hand crafted polymer (much like silly putty!) and even get a taste of one of your experiments!!!

Additional Party Information for the Host

- Additional fees apply for each participant beyond the included 15
- We do request that participants are seated at tables with chairs. We cannot provide the tables and chairs.
- Additional fees apply to parties outside our general service area, please call for details, (770) 667-9443.
