Science Made Fun!

What people are saying about our parties...

Thank you very much for everything for Peter's birthday party. All kids enjoyed and loved the science party from HT. The Lab Loot bags are also great. My son and even some kids are still excited to work with the bag at home and can't stop talking about that day. For me, It was also easier to prepare the party because the scientist, Ms. Karen handled the kids very well. Thank you again for making a memorable party for my son. :-)
Mary

Great party thank you. You made the birthday girl feel special with small gestures. Great pace, informative yet hands on.
Kathryn

The party was a huge success. The kids were thoroughly entertained the whole time. Our party scientist was extremely patient and full of energy. She came very organized and prepared.....now that's skill with all those BUSY boys. That's a compliment because I teach kids myself!.....it was a tough crowd!! It couldn't have been better. THANK-YOU so much. What a great treat for us all and a real memory maker.
Tracy

Wow, What an awesome birthday party!!!! Thank you to Karen for doing an amazing job. My daughter had such a good experience. I really appreciate the extra attention she got as the birthday girl. Karen was so well prepared and kept the children engaged for the entire 75 minutes. Every child had a great time. Some parents commented it was the best birthday party they had ever experienced.
Tom, Heather & Christina

The space birthday was a real hit, especially with Laura, so thank you very much for helping us host a fun and interesting event. Karen was a fantastic teacher and she really explained things so that all the participants could become involved. I could not make one comment as to how to improve the party. In my books, it was top notch and very organized. I would like to let you know that one thing in particular is very well done and sets this apart from most other party venues/activities- the birthday person is made to feel very special. Laura is still reminding us that she got to 'go first' for everything on her birthday. So, keep making the birthday kids feel special -after all, it is their day! Thanks again.
Diane

I have to tell you that Genius George was absolutely amazing. He kept the kids' interest the whole time and they all had a ball. He had a great sense of humor, very intelligent, and a nice tone of voice in keeping the children calm & sitting down. We really appreciated having him. He made Jackson's birthday fantastic. I have also had lots of feedback from parents too, who said their child had a blast.
Laura

Science Made Fun!

What people are saying about our parties...

George was great at Joseph's birthday on April 11th. He was patient, gave clear expectations and had a variety of activities for the boys to do. I would recommend him to others.- *Mark and Toni*

The party was great! The kids were amazed and had fun and are still talking about it. George was good with the kids and got them under control very quickly before their excitement was able to interfere with the program. I highly recommend your party science program.- *Carol*

Everyone had a great time, even the next day at school a few girls had their space mud and were blowing bubbles with it. I know that was a big hit with my kids. George was very good, professional, great with the kids of all ages, and safety conscious too. I will definitely pass your party info onto anyone who is interested. Thanks to George for making the day fun.- *Barb and Samantha and little brother Ty*

I can tell you that Genius George was great at keeping the group focused and having fun. Things can get out of control easily with a big group of 7 & 8 year olds. George had a handle on it the whole time. The kids really enjoyed it, too.- *Hilary*

"Genius George" was great. I can't believe how well he handled 12 excited kids. It was a fantastic party and I would highly recommend your company. Jeanie had a great time.- *Paula*

Hello, I would love to tell you that the party was a great success. All the kids had a wonderful time, and I cannot say enough about our "Scientist" Karen. She was absolutely fantastic with all the kids. They were laughing, behaving, and having fun. Karen is going to be a fabulous teacher. We all loved her. Thank you very much for a great party.- *Maria*

We LOVED having Genius George guide all the kids through the wonders of science! George was awesome at keeping the kids interested as well as in control (not always easy with a group of 6 year olds!) I think he really made Flynn (the birthday boy) feel special with the extra attention that was given to him. Anyways, well worth the money spent! Thanks again!- *Kirsten*
